NETBYTE
TECHNOLOGIES

bridging the digital divide

www.netbyte.co.zw

About Us

Netbyte Technologies is an emerging technology boutique introducing a new era of digital-transformation on-demand. We are positioned to provide professional enterprise solutions to businesses of all sizes in different industries in the EMEA region.

We are driving the latest innovative technology trends and solutions in new-technology consultancy & advisory services, networking, data & network security, data centre infrastructure, access control, B2B as well as intelligent surveillance systems (CCTV).

Mission Statement

To be the leading and reliable customers' first point of reference in new-technology consultancy & advisory services, networking, data & network security, data centre infrastructure, access control, B2B solutions as well as intelligent surveillance systems (CCTV).

Aim

To help businesses realize their fully throttled potential, through:-

- ❖ Maximizing business systems performance,
- ❖ Lowering OPEX, CAPEX and TCO through best feasible solutions,
- ❖ A modern secure, intelligent and adaptive business environment and
- ❖ Simplifying business processes through easy-to-adopt AI driven systems.

Our Core Values

Integrity

We conduct our business in accordance with the highest standards of professional behaviour and ethics. We are transparent, honest and ethical in all our interactions with employees, clients, consumers, vendors and the public.

Customer focus

Netbyte Technologies values its customers, the company makes and strives to make sure that every company or individual they do business with leaves with a smile on their face through the use of technology and innovation to satisfy their needs.

Professionalism

Our work must be the first proof of professionalism and we vow to uphold high quality professional services in all we do to preserve our key value of professional competence.

Honesty

At Netbyte, honesty is one of our own promises and obligation, to provide quality, reliable, fair, truthful and morally upright business practises to our best ability on a daily basis. To us it simply involves telling the truth at all times, and being transparent in every business practise with you.

Innovation

We acknowledge the weaknesses within our industry and create ethical, forward thinking solutions to overcome them. We identify, develop and deploy leading edge technology and process improvement tools. We embrace each individual's unique talents and honour diverse life and work styles.

Professionalism

Our work must be the first proof of professionalism and we vow to uphold high quality professional services in all we do to preserve our key value of professional competence.

Accountability

Accountability is the glue that holds together our commitment to our customers, in order for them to be successful. When our customers succeed, we as a Company succeed. In order to be world-class accredited professional ICT services provider, we uphold and take full accountability and responsibility of our actions with an aim to follow ethical work procedure to, earn your trust as we strive to deliver exceptional customer service. It will always be important to us to be accountable to our company mission statement: To be the leading and reliable customers' first point of reference in new-technology consultancy & advisory services, networking, data & network security, data centre infrastructure, access control, B2B solutions as well as intelligent surveillance systems (CCTV).

Workmanship, Ethics & Stewardship

Without our safety-minded workforce, and environment-change awareness our company would cease to exist — it is that simple. That is why we hire the best and brightest minds in the industry. And by providing the best training, we watch our employees strengthen their skills to further our company's success. Furthermore, we appreciate the community around us and how they play each pivotal role to the success of the businesses around us as we seek to offer products and services that bridges the digital divide.

Our Product & Services

Corporate Networking

we provide complete solutions from network designing, implementation, reliable support and documentation of fully compliant solutions for high-bandwidth and high throughput capable networks.

Network Security

Netbyte can easily help you, increase your perimeter security awareness through intelligent AI driven, automated network and data security solutions

Data Centre Solutions

Get the best insight on how your critical business applications can be run highly available through the best practises of data centre computing, storage and networking.

Our Product & Services (cont.)

CCTV Surveillance

Our Intelligent Surveillance Solutions addresses the most comprehensive need for protection in every industry, eliminating blind spots in every important perimeter.

Access Control

We guarantee you a 360 perimeter Access Control, Intruder Alarms, Alarm Monitoring and Integrated Systems for enterprise, homes, industrial and business suites.

B2B Solutions

We offer an extensive spectrum of business processes automation and IT integration in CRMs, ERPs, POS systems, Web Systems and more.

OUR SOLUTIONS

Enterprise Networks

i. LAN Cabling 

Our Technical team consists of experienced staff with more than 20 years of experience in cabling and are ready to design and implement standardised cabling in your enterprise networks.

ii. Data Centre Wiring 

We wire your datacentre to unify your storage, LAN and WAN. Proper datacentre wiring helps to improve throughput and our engineers are available to design wiring of your datacentre cables.

iii. Network Design – LAN and WAN 

An optimised network improves production, Netbyte provides WAN and LAN solutions that scales with dynamics in technology and environment.

iv. Network Automation 

Everything is being automated, we prescribe to you solutions that automate your operation, from traditional computing to automated network processes. Downtimes are reduced and production increase, automation helps to control OPEX.

v. NOC and SIEM solutions 

We provide solutions that streamline visibility, these solutions provides end to end visibility of your network and helps to proactively act before problems occur. Stay ahead with NOC and SIEM solutions powered by Netbyte Technologies.

ENTERPRISE SECURITY

i. LAN Security ✓

Netbyte provides internal security solutions using well known security vendors, the cisco ISE AAA server is used to authenticate, authorise and account for all connections to LAN network. We also prescribe and implement solutions such as Trustsec and MACSec to provide end to end security. According to Cisco most organisations leave internal networks unprotected and focus on perimeter security, internal networks are as dangerous as perimeter network.

ii. Wireless Security ✓

Our wireless solutions aim to protect one of the difficult transmission to secure – the Wireless. Its lack of boundary increase its vulnerabilities, Netbyte provides solutions that harden wireless security against possible attacks.

iii. Data Centre Security ✓

We provide solutions that secure your datacentre, internal firewalls and segregate traffic between users and datacentre resources

iv. Perimeter Security ✓

We offer solutions to protect your perimeter using Firewalls and IPSes, we believe in the defence in depth principle to increase network defence.

v. WAN Security – VPNs ✓

We prescribe WAN solutions for you, and design and implement strong VPNs using strong algorithms to protect data

vi. Remote Access and Tele working solutions ✓

Anywhere-Connect-VPNs helps to improve productivity through allowing users to access production from anywhere securely

vii. Security Assessments ✓

We offer security posture assessments and provide you with recommendations. Vulnerability assessment, PCI-DSS readiness etc.

DATA CENTER SOLUTIONS

We offer the following robust and scalable solutions in the data centre space

i. Data Centre design ✓

We design scalable and highly available datacentres for you.

ii. Data Centre Security ✓

Secure your datacentre through prescribing Next-generation datacentre security.

Virtualised firewalls and IPSes are used to segregate traffic within a datacentre.

iii. Data Centre Switching ✓

We prescribe highly scalable data centre switching designs that support protocols like Fibre Channel (FC) and fibre channel over ethernet (FCoE). These converged solutions improves datacentre connectivity and simplicity as well as resource utilisation.

iv. Data Centre Virtualisation ✓

Virtualise your datacentre and realise maximum resource usage. Share your resources between devices and applications.

v. Disaster Recovery Solution ✓

We specialise in designing disaster recovery sites for high availability.

COLLABORATION SOLUTIONS

Video Conferencing

Now you can cut your inter-branch logistics expenses upto 78% and make every second of your business time counts, thanks to the new video conferencing solutions from Polycom and Cisco, you can do even video meetings using telepresence solutions.

IP Telephony

Netbyte now gets you going through optimizing your IP data usage, Switch to the IP telephony solutions that makes use of converged IP and data use for improved usage of resources and cost reduction.

Integrated system

Your Cisco environment offers you the best starting point to integrate your Skype-For Business with Cisco Jabber and telepresence solutions. Automate your communication system and enjoy management with ease.

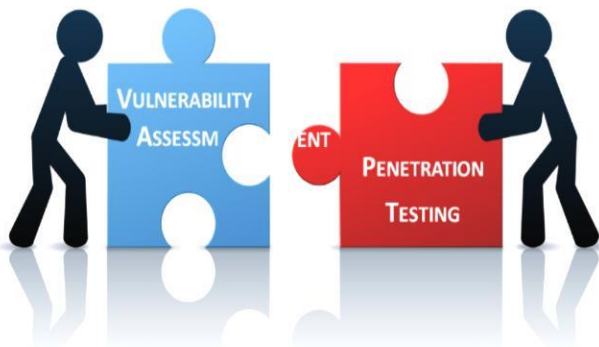

SPECIALIST SERVICES

PCI DSS Compliance analysis

Netbyte can help your Financial Institution as well as your banks to store customers' personal data with compliance and approved methods by following a global set of PCI-DSS security standard and we can offer you a better analysis and reporting of your core network state in relation to these PCI-DSS requirements.

Vulnerability Assessment

Do you need a better insight about your current network or remove any doubts about it? We provide an analysis of network's vulnerabilities and giving you the most suitable option of remediation.

Network Posture Assessment

We analyse and provide a network posture that provides the current network state and the expected state and how the gap can be closed.

SPECIALIST SERVICES (cont.)

Data Centre Network Automation

As IoT, Automation and Virtualization takes the centre of technology today moving towards SDN, SDS, SDC and network programmability in just inevitable, Netbyte can now provide you road map to bridge and transition from traditional networking to next generation automated techniques.

Network Optimisation

We offer a broad spectrum of tools and applications that helps you analyse and optimise your network for improved functionality and performance.

Network Analytics and Monitoring

As Netbyte, We have gone ahead of the rest, to study the best AI tools that can be used today to help you monitor your network, giving you a better insight of your bandwidth, throughput, usage and carnage during peak as well as off-peak hours and help you remediate it

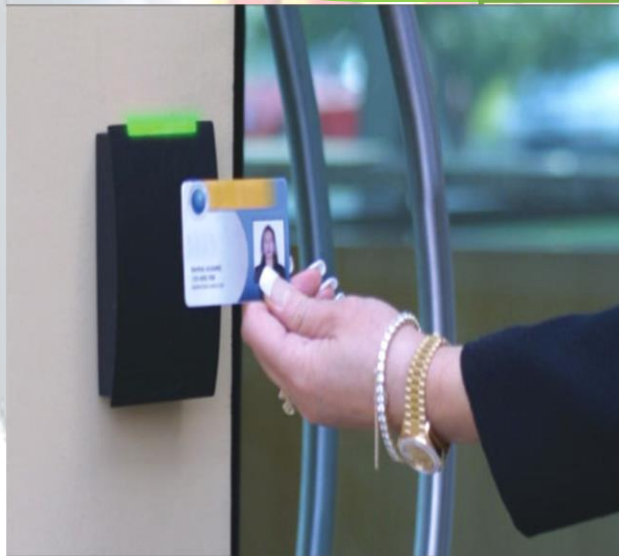

CCTV SURVEILLANCE & ACCESS CONTROL

CCTV Surveillance

Setting up cameras for surveillance is one thing, but understanding the security needs of every industry is everything, that's why at Netbyte we customize your surveillance solutions to meet your special needs as well as adopting the best practices of your industry

Access & Intrusion Control Systems

We specialize in Access Control, Intruder Alarms, Alarm Monitoring and Integrated Systems for enterprise, homes, industrial and business suites

CCTV Remote/SAN/Cloud Backup Solution

Did you know you can record the footage from your Hikvision DVR or IP cameras directly into the cloud such as [Google Drive](#), [Dropbox](#) or [OneDrive](#) cheaply or remotely to your existing SAN /Enterprise private cloud solution?, and out of the box be a Multi-tenant Service Provider.
